

Invitation

IUCN webinar on 'No Net Loss and Net Positive Impact Approaches for Biodiversity: exploring the potential application of these approaches in the commercial agriculture and forestry sectors'

Thursday 11 June, 10 am CET and 4 pm CET

WBCSD and IUCN's Global Business and Biodiversity Programme invite you to a webinar to present a summary of IUCN's new report, discuss its implications and possible next steps.

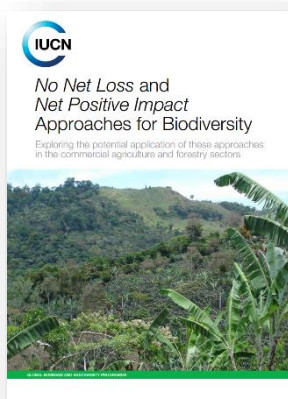

The report – entitled '*No Net Loss and Net Positive Impact Approaches for Biodiversity: exploring the potential application of these approaches in the commercial agriculture and forestry sectors*' – will be of interest to anyone working on biodiversity in landscapes with commercial agriculture and forestry activities, as well as biodiversity-related best practices and standards in these sectors.

The report examines how commercial agriculture and forestry production can reduce global biodiversity loss by applying an innovative approach – Net Positive Impact or NPI – which is already used by some companies in the extractive and infrastructure sectors.

Webinar details

- **When:** Thursday 11th June – 2 options, either 10.00 CET or 16.00 CET (1 hour)
- **Agenda:**
 - Introductions
 - IUCN and NPI, with Steve Edwards (Senior Programme Manager)
 - Report summary, with Dev Aiama (Lead author)
 - Q&A
 - Next steps
- Please refer the outlook calendar invite for more information, or contact Nadine McCormick at IUCN for any questions (Nadine.McCormick@iucn.org)
